►► Introduction

Digital Rotary Viscometer is a type of intelligent instrument for testing liquid viscometer. It can complete testing work under the computer's procedures and exports testing results by display. It use MCS-51 series computer to control the rotate speed and all the testing procedure. This not only make it come true that adjust rotate speed continuously but also increase it's precision. It is widely applied in the field of petri chemistry, medicine, food, light industry, textile industry, scientific research, etc.
