DMP 2000 is a portable and robust device measuring soil water over multiple depths (at 10 cm intervals) in the profile. DMP 2000 consist of a probe and hand held data logging display unit.

The patented 'Swipe and Go' technology means that DMP 2000 does not need to be held at each individual depth in the soil profile. To take a reading the encapsulated capacitance sensor is simply swiped in and out of the access tube, measuring up to 16th depths in just a few seconds
