►► **Product Overview**

The ATL is a highly sensitive handheld Gamma-Ray spectrometer capable of identifying single or multiple isotopes simultaneously. The ATL also provides the user with various functions such as Search and Find, optional Neutron Detection, Nuclide ID, Dose Rates and accumulated Dose Rate.

- Large isotope library
- Lightweight with longer battery life
- RadView software for integration
- Large backlight display
- Automatic energy stabilization (no check source required)
- Easy to follow menus
- Large internal memory

►► **Detect and identify specific radioactive isotopes in a sample**

The ATL Gamma-Ray spectrometer utilizes the highest quality Thallium doped Sodium Iodide crystal, combined with an integral high signal-to-noise ratio PMT and state-of-the-art electronics and embedded micro controller firmware. All of these enhanced features allow the ATL to be one of the most accurate portable Gamma-Ray spectrometers when it comes to identifying specific and/or multiple isotopes even with weak gamma sources. The mechanical assembly of the ATL is robust and designed for field applications where harsh environments are commonplace.

►► **Simplified and Flexible**

The ATL operating system utilizes sensible easy to read and follow menus. The multi-position joystick and large LCD backlit display provides easy navigation through menu selections. Detailed spectral information is clearly and precisely displayed so knowledgeable users have the ability to visually identify peaks in the histogram. Various on-screen messages assist the user when immediate attention is required for issues such as preset timing, high radiation levels, alarm settings and warning messages.

►► Remote ATL PC Spectral Analysis and Data Storage Software

The ATL is equipped with a high capacity internal memory that allows large amounts of data to be stored by record number, date and time. Stored data such as spectral and dose rate information can be easily downloaded to a PC via a mini USB or Bluetooth (optional). The downloaded data can then be displayed and managed with RadComm's exclusive RadView software. Primary features such as the selection and highlighting of Region Of Interest (R.O.I.) details and Zoom In/Out of the gamma energy histogram can be easily performed. The ATL PC software has all the necessary features that will meet the needs of virtually any user.
