Semi-Automatic Rotary Microtome

Spedally designed for precise sectioning of tissues up to 1 micron thickess, it has a front located feed indicator with CAM DRIVE SYSTEM for accurate feed setting from 1-500 microns in steps of 1 micron each. The microtome razor is fabricated from imported fine grain steel alloy, tested for micro structures and the razor is heat treated to maintain optimum strength and sharpness.

This model has advanced technology with usage of selected alloys for manufacturing of individual components as per international standards. All its precision components, moving parts adjustment, centering screws and also the complete razor holder assembly etc are fabricated from specific alloys to ensure perfect functioning and long life of the equipment.
