

SOES - 3101

Spark Optical Emission Spectrometer

EPCC / PRODUCTS / APPLICATION / SOFTWARE / ACCESSORIES / CONSUMABLES / SERVICES

Analytical Technologies Limited

An ISO 9001 Certified Company

www.analyticalgroup.net

►► Product Introduction

Metal producing and fabricating plants require truly advanced elemental analysis at every step — from incoming materials to in-process testing to final inspection for outgoing quality. One analytical instrument measures up every time. With outstanding repeatability, reproducibility, and reliability, SOES 3101 is perhaps the industry's best-selling arc/spark optical emission spectrometry (OES) analyzer. Its fast, accurate, cost-effective measurements add certainty to critical supply chains.

Users get ultrafast information on changing process conditions. Also drastically reduced cost of ownership — with lower consumables, plus advanced diagnostics and easy maintenance to prevent expensive downtime. And this tenth-generation SOES 3101 responds to evolving plant requirements with a host of new improvements, as shown below.

►► FAST, SIMPLE STANDARDIZATION WITH iCAL 2.0

Using conventional analyzers, standardization can take 30+ minutes, demand multiple samples, and require reruns whenever site conditions change. By contrast, in most cases ATL's proprietary iCAL 2.0 calibration logic needs only 5 minutes and a single sample per day. Plus it automatically compensates for most changes in environmental temperature or pressure. So SOES 3101 delivers outstanding stability, productivity, and savings, time after time.

►► NEW ANALYTICAL PERFORMANCE

SOES 3101 features completely new factory calibrations, with extended calibration ranges and element selections; optimized source excitation parameters; and improved limits of detection (LODs). Example: for iron (Fe), aluminum (Al), and copper (Cu) matrices, the analyzer surpasses its already impressive performance with 30% to 40% better LODs.

►► NEW ARGON COST SAVINGS

SOES 3101 models significantly decreased their consumption of expensive argon (Ar) gas. A brand-new feature now allows total shutdown of argon flow during standby, for periods configurable by the operator. Users save more consumables costs than ever!

►► NEW EASE OF USE

SOES 3101 now provides routine, trouble-free analysis of 10 matrices, 65 methods, and 59 elements — via convenient controls for operation; easy access for use and maintenance; and enhanced software features such as quickcheck programs, virtual type standards, and spectrum scans.

►► EASY-TO-USE SOFTWARE

Even for less experienced personnel, ATL's SPARK ANALYZER Pro software provides effortless operation. Favorites include application profiles tailored to preset user requirements; automatic program selection of sub-methods for given materials; spectra storage for later recalculations; multiple data export formats; and software-only upgrades for new lines, methods, or matrices.

Newest software highlights:

- Backup tool — for easy backups to network, other drives, etc.
- Virtual type standards — to improve accuracy by combining optimal element samples for type correction
- Extended grade library — for iron, aluminum, copper
- Quick-check programs — to identify & analyze main elements in under 12 seconds: for iron & aluminum materials, & now including analysis of copper
- Spectrum scan (optional) — to compare spectral lines of multiple samples in the same view
- Shift change protocol (optional) — to summarize all activities in a given shift: for handover to next operator, or QA optimization

►► HARDWARE NOTE

The latest SOES 3101 eliminates a magnesium fluoride (MgF_2) window at the spark stand — saving costs and maintenance replacement efforts.

►► Instrumentation Features

Optical Systems Optic I:

- Wavelength range 120 nm – 235 nm
- Focal length 300 mm, Holographic grating with 3600 gr. / mm
- CMOS detectors

Optic II:

- Wavelength range 233 nm – 670 nm (optional -766 nm)
- Focal length 400 mm, Holographic grating 2400 gr. / mm
- CMOS detectors

The applicable and configured wavelength range is based on the customer's application requirements. Both optics are temperature stabilized and pressure compensated.

Plasma Generator:

The benefit of this full digitalization with high fidelity is the guarantee that the spark pulse created is the spark pulse desired, every time.

Precision is improved and so is the similarity of the generated spark signals (unit uniformity). With our off-line digital control, we ensure that each plasma generator delivers identical spark signals, with a negligible deviation between any two plasma generators.

Every plasma generator has a programmable output power waveform for application specific optimization.

Online drift correction and background correction:

- Permanent control of the peak position of each line and readjustment if needed (iCAL 2.0)
- Recalculation of the background signal wherever it is possible

Optimized Measurement Times:

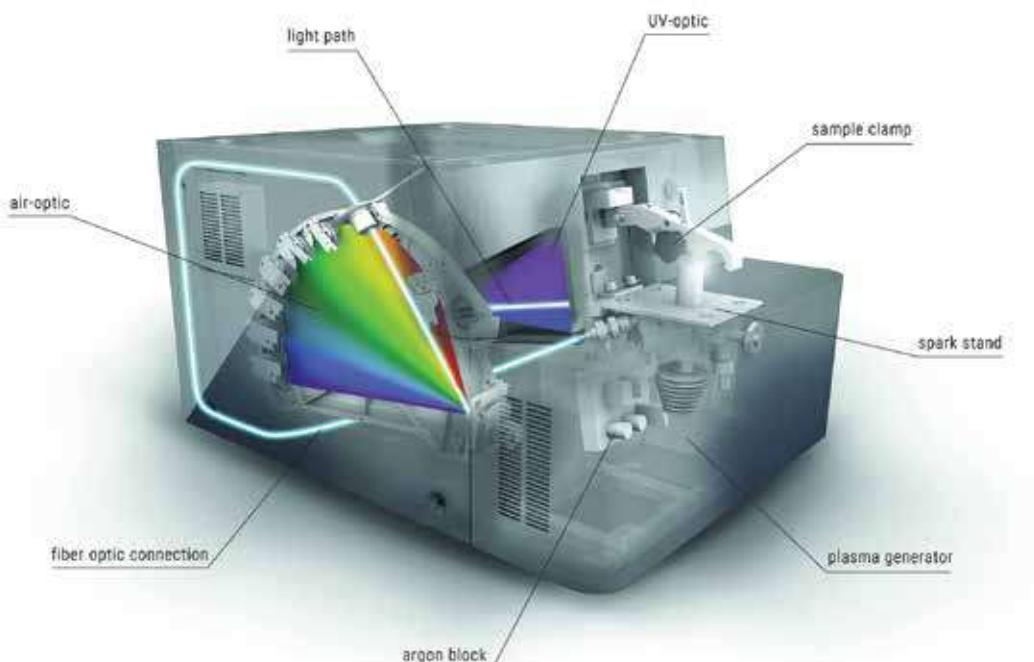

- Dynamic pre-burn time, reflecting the sample quality
- Minimized delay between measurement sequences
- Optimized number of excitation parameters including frequencies of up to 1000 Hz

Intelligent Calibration Logic (iCAL 2.0):

- Profile position control and standardization with only one sample

» Accuracy of Analysis

It is the aim of modern OES spectrometers to greatly reduce the influence of the structure and composition (matrix) effects. The SOES 3101 combines traditional technologies like HEPS-High Energy Pre Spark to reach the stationary phase by “remelting” a small portion of the sample, resulting in a reduced structure effect.

HPLC Servicing, Validation, Trainings and Preventive Maintenance :

- HPLC Servicing** :HPLC Servicing : We have team of service engineers who can attend to any make of HPLC promptly @the most affordable cost.
- Trainings** :We also take up preventive Maintenace to reduce downtime of HPLC's Trainings.
- AMC's/CMC** :AMC's/CMC :We offer user training both in-House and at customer sites on HPLC principles, operations, trouble-shooting.
- Validations** :Validations :We have protocols for carrying out periodic Validations as per GLP/GMP/USFDA norms.
- Instruments** :Instruments/Renting Services Modules like pumps,detector etc. on Rent.

About Analytical Technologies

Analytical Technologies is synonymous for offering technologies for doing analysis and is the Fastest Growing Global Brand having presence in at least 96 countries across the global.
