►► Advantages over the Conventional Uroflowmeter:

- No need for the wired connection from bathroom to computer.
- Wireless connection allows the Vmic sensor to be kept in the Bathroom whereas the reports can be monitored from computer in attendant's cabin.
- FlowComp-NG comes with the StatFlow, SME's proprietary software specially developed for uroflowmetry.
- Using the StatFlow test attendant can add patient, start test, stop test, print the report while sitting in his cabin.
- Autoflush cleans the Urinal after every test is completed, No need for the clinical staff to clean the beaker after every test.
- You will not need a separate computer for uroflowmetry, only the LCD screen is sufficient. Sampling rate, Reporting parameters and accuracy of the readings is as per the ICS (International Continence Society) guidelines.
- The new report format is well organised and easy to read consisting all the report parameters required for the uroflowmetry diagnosis.
- As the FlowComp-NG is computer based, SME can provide the online support for this machine which will help us to serve you better and quick.
